The AUTODOME IP dynamic 7000 HD is an easy to install, high-speed PTZ dome camera, in a field-proven indoor/outdoor pendant housing or indoor in-ceiling housing, that delivers unmatched picture quality and network performance day and night with superb high-definition (HD) 1080p25/30 video and 30x optical zoom.

The camera provides complete network-based control of all dome functionality including pan/tilt/zoom operation, presets, tours and alarms as well as web-based configuration of all dome settings. It also provides direct network video streaming using H.264 compression / bandwidth throttling to efficiently manage bandwidth and storage requirements while delivering outstanding image quality.

**Functions**

**High-performance HDR PTZ day/night camera**

Exceptional dynamic range and low-light sensitivity make the camera an exceptional performer in scenes with simultaneous bright and dark areas. When operated in high dynamic range (HDR) mode, the camera makes multiple, simultaneous exposures of the same scene to capture details in both bright and dark parts of the scene. In low light, the camera switches automatically from color to monochrome by removing the IR filter to boost sensitivity, while maintaining superior image quality. Dynamic models have a full HD (1080p30) imaging platform with multiple exposures capable of delivering high dynamic range (HDR) video in scenes with simultaneous bright and dark areas. When operated in...
HDR mode, the camera makes multiple, simultaneous exposures of the same scene to capture details in both bright and dark parts of the scene.

**Sodium vapor lamp white balance**
The camera is an exceptional performer when capturing video under a sodium vapor lamp (a street lamp or tunnel lamp, for example). Images under these conditions may have a yellowish tint, which can make identification difficult. In the Sodium Vapor White Balance mode, the camera automatically compensates for the light from a sodium vapor lamp to restore objects to their original color.

**Five (5) pre-programmed user modes**
Five pre-programmed but configurable user modes, optimized with the best settings for a variety of typical applications, make on-site programming easy and user-friendly. Users select from the menu the mode that best defines the environment in which the camera is installed:
- **Outdoor** – General day-to-night changes with sun highlights and street lighting
- **Indoor** – Ideal mode for indoor applications where lighting is constant and not changing
- **Low light** – Optimized for sufficient details at low light
- **Motion** – Monitoring traffic or fast moving objects; motion artifacts are minimized
- **Vibrant** – Enhanced contrast color reproduction and sharpness

Users have the ability to customize these modes, if necessary, for the specific requirements of the site.

**Image Stabilization**
As PTZ cameras continue to increase their optical zoom capabilities, image stabilization becomes critical to eliminate movement caused by unstable camera mounts. Minor movement of the camera mount can shift the field of view by a large distance when the camera is zoomed to a high value. This can render images unusable. The camera incorporates an Image Stabilization algorithm that allows the camera to detect continuous vibration. If it detects vibration, the camera dynamically corrects the shaky video in both the vertical and horizontal axis, resulting in exceptional image clarity and a stable field of view on the monitor.

**Superior privacy masking**
The camera provides 24 individual, easy to configure privacy masks, with up to 8 displayed in the same scene. As the camera is zoomed, each mask changes size smoothly and quickly, ensuring that the covered object cannot be seen in most cases.

**Sophisticated alarm responses**
The camera supports advanced alarm control that uses sophisticated rules-based logic to determine how to manage alarms. In its most basic form, a “rule” could define which input(s) should activate which output(s).

In a more complex form, inputs and outputs can be combined with pre-defined or user-specified commands to perform advanced camera functions.

**PTZ drive and mechanism**
The AUTODOME 7000 supports 256 pre-positions and two styles of Guard Tours: Preset and Record/Playback. Users can configure the preset standard tour with as many as 256 sequential pre-positions, with a configurable dwell time between pre-positions. The AUTODOME Series also provides support for two recorded tours, which are recorded macros of an operator’s movements, including pan, tilt, and zoom activities, and can be played back with the click of a button.

Pan and tilt preset repeatability are accurate to within ±0.1 degrees to ensure that the correct scene is captured every time. The camera delivers variable pan/tilt speeds from a crawl speed of only 0.1 degrees per second to a full 400 degrees per second. The camera is capable of pan speeds of 400 degrees per second and tilt speeds of 300 degrees per second between prepositions. The camera provides a tilt angle 18 degrees above the horizon, and a pan range of up to 360 degrees continuous rotation.

**Content-Based Imaging Technology**
Content-Based Imaging Technology (C-BIT) is used to radically improve image quality in all lighting conditions and to identify areas for enhanced processing. The camera examines the scene using intelligent video analytics and provides feedback to tune the image processing. This provides better detail in the areas that matter and better all-round performance. The intelligent, automatic anti-fog technology, for example, allows you to view video clearly through a foggy scene or can improve contrast in dark areas of a scene.

**iDNR reduces bandwidth and storage requirements**
The camera uses intelligent Dynamic Noise Reduction (iDNR) which actively analyzes the contents of a scene and reduces noise artifacts accordingly. The low-noise image and the efficient H.264 compression technology combine to provide clear images while reducing bandwidth and storage by up to 30% compared to other H.264 cameras. This results in reduced-bandwidth streams that still retain a high image quality and smooth motion. The camera provides the most usable image possible by cleverly optimizing the detail-to-bandwidth ratio.

**Anti-fog**
With the anti-fog mode feature, visibility can be improved significantly when viewing foggy or other low-contrast scenes. Users can configure the mode to be active continuously, or to activate automatically when the video analytics in the camera detect fog and add light to the video image (and then deactivate when the fog clears or the scene changes).
Intelligence
With built-in video content analysis, the AUTODOME reinforces the Intelligence-at-the-Edge concept where edge devices become increasingly intelligent.

The AUTODOME comes with Bosch’s Intelligent Video Analysis (IVA) built-in. IVA is state-of-the-art intelligent video analysis that reliably detects, and analyzes moving objects while suppressing unwanted alarms from spurious sources in the image. The IVA functionality built into the AUTODOME is able to detect idle and removed objects as well as loitering, multiple line crossing, and trajectories. IVA also supports BEV (Bird’s Eye View) People counting. Assisted Self Calibration and configurable detection filters improve reliability and reduce operator workload.

Intelligent Tracking
The camera utilizes the built-in Intelligent Video Analytics (IVA) to follow an individual or an object continuously. Objects detected by IVA in a stationary position activate the Intelligent Tracking feature, which controls the pan/tilt/zoom actions of the camera to keep the tracked object in the scene.

The new tracking feature is based on robust flow detection algorithms which can reliably track moving objects even under challenging scenes. The tracking and detection reliability can be enhanced further with virtual masking for scenes with a lot of background “noise” such as trees or other objects creating constant motion in the scene.

The camera supports three modes for Intelligent Tracking.
- **Auto mode**: When configured in this mode, the camera actively analyzes the video to detect any moving object. If it detects movement, it begins to track the object. This mode is most useful for scenarios where no motion is expected in the scene.
- **Click mode**: In this mode, users can click an object moving in the live video image to enable the camera to track the movement of the selected object. This mode is most useful for scenarios where normal scene activity is expected.
- **IVA-triggered mode**: In this mode, the camera continuously analyzes the scene for IVA alarms or IVA rule violations. If an IVA rule is violated, it triggers the advanced tracking feature of the camera to start following the object / person that triggered the alarm. This unique combination of robust IVA and Intelligent Tracking allows the camera to track moving objects of interest without getting distracted by other moving objects in the scene.

Virtual masking
The camera offers Virtual Masking, which gives users flexibility to mask parts of the scene which should not be considered for flow analysis to trigger Intelligent Tracking. This allows users to mask background motion in the scene such as moving trees, pulsating lights, busy roads from IVA/Tracking without blocking it from the video.

Common product platform (CPP4)
The camera has an advanced, efficient H.264 encoder (CPP4) embedded for high quality HD streaming video and very efficient streaming and network capabilities. The new platform supports simultaneous streaming of individually configurable HD streams, and allows a choice of HD resolution in combination of SD resolutions.

Advanced streaming
The camera offers advanced streaming capabilities so that you can configure the camera to take advantage of the latest network technology.

The camera is designed on the most efficient and powerful H.264 encoding platform capable of delivering high-quality HD video with very low network load. The new intelligent encoding capabilities drops the bandwidth consumption to extremely low levels if the camera detects no motion in the scene.

The camera is capable of quad streaming which allows the camera to be configured to deliver independent, configurable streams for live viewing, recording, or remote monitoring on constrained bandwidths.

Recording and storage management
A memory card (SD (Secure Digital), SDHC (Secure Digital High Capacity), or SDXC (Secure Digital eXtended Capacity)) can be used for local alarm recording or for Automatic Network Replenishment (ANR) to improve the overall recording reliability. Recording management can be controlled by the Bosch Video Recording Manager (VRM), or the camera can use iSCSI targets directly without any recording software.

ONVIF conformant
The camera conforms to the ONVIF (Open Network Video Interface Forum) specification which guarantees interoperability between network video products regardless of manufacturer. The ONVIF Profile S specification allows easy integration with the conformant devices and VMS. ONVIF conformant devices are able to exchange live video, audio, metadata, and control information, and ensure that they are automatically discovered and connected to network applications such as video management systems.

Video management system support
The camera ships with Bosch Video Client (BVC), an easy-to-use software from Bosch that is suitable for midsize installations. For large enterprise systems, AUTODOME cameras can be used with Bosch Video Management System (BVMS), which allows enhanced video management and viewing capabilities.

In addition, the camera is supported/integrated into all of the leading third party video management systems.
Ease of installation and servicing
The camera has been designed for quick and easy installation; a key feature from Bosch CCTV products. All housings feature recessed screws and latches for increased tamper resistance. Indoor/outdoor pendant housings are rated to provide IP66 protection and offer an operating temperature range down to -40 °C (-40 °F). The indoor/outdoor pendant comes fully assembled with a sunshield and ready for wall or pipe applications with the proper mounting hardware (sold separately). In addition, the camera models with both pendant and in-ceiling housing come equipped with a low-impact, high-resolution acrylic bubble for enhanced image clarity. You can easily convert the outdoor pendant for indoor applications by removing the sunshield.

Bosch offers a full complement of hardware and accessories (sold separately) for wall, corner, mast, roof, pipe mount, and in-ceiling applications for indoor and outdoor environments, which allow the camera to be adapted easily to individual site requirements.

Dual power options
All models can be powered by a High Power-over-Ethernet (Bosch High PoE)-compliant network using a Bosch High PoE Midspan (sold separately) over a single network cable and/or a 24VAC power supply. When powered using High PoE or PoE+ (IEEE 802.3at class 4) configuration, only a single cable connection is required to power and to control the camera while also viewing images from the camera. For additional system reliability, users also have the option to connect the 24 VAC power supply to the camera while using High PoE.

Fiber Optic Kit
Bosch offers the optional VG4-SFPSCKT, a unique media converter module for use with various Bosch devices. This media converter module is designed to accept a wide-range of 10/100 Mbps SFP modules for use with Multimode or Single-mode optical fiber with LC or SC connectors. The media converter module along with the SFP module is user-installed directly into the camera’s power supply box to provide an integrated fiber optic solution.

Easy upgrade
Remotely upgrade the camera whenever new firmware becomes available. This ensures up-to-date products, thus protecting investment with little effort.

Unsurpassed reliability
As with all Bosch products, the camera has been subjected to the industry’s most comprehensive and demanding battery of endurance tests such as HALT (highly accelerated life testing) to make sure it will hold up through years of use. And of course, it comes with Bosch’s industry-leading 3-year warranty.

Certifications and approvals
HD standards
- Complies with the SMPTE 274M-2008 Standard in:
  - Resolution: 1920x1080
  - Scan: Progressive
  - Color representation: complies with ITU-R BT.709
  - Aspect ratio: 16:9
  - Frame rate: 25 and 30 frames/s
- Complies with the 296M-2001 Standard in:
  - Resolution: 1280x720
  - Scan: Progressive
  - Color representation: complies with ITU-R BT.709
  - Aspect ratio: 16:9
  - Frame rate: 25, 30, 50 and 60 frames/s

Electromagnetic Compatibility (EMC)
Complies with FCC Part 15, ICES-003, and CE regulations, including latest versions of EN 50130-4, EN 55022:2006 inc. AL:2007, EN 61000-3-3, EN 61000-6-1, EN 61000-6-2, and EN 50121-4 (Railway applications)

Product Safety
Complies with UL, CE, CSA, EN, and IEC Standards 60950-1 & 22

Environmental
In-ceiling: IP54, Plenum rated (with acrylic bubble)
Also: IK8 rating when using optional Polycarbonate bubble (sold separately)
Indoor/Outdoor Pendant: IP66, NEMA 4X

ONVIF Conformance
EN 50132-5-2

Notice
Conformity to EN 50130-4
One of the following power supply units is required to conform to the EN 50130-4 standard: VG4-A-PSU0, VG4-A-PSU1, VG4-A-PSU2, VG4-A-PA0, VG4-A-PA1, or VG4-A-PA2.

Data Rate 9.6 kbps to 6 Mbps

Overall IP Delay 240 ms

Audio

• Standard G.711, 8 kHz sampling rate L16, 16 kHz sampling rate AAC, 16 kHz sampling rate
- **Signal-to-Noise Ratio**: >50 dB
- **Audio Streaming**: Bidirectional (full-duplex)

### Local Storage
- **Memory Card Slot**: User-supplied SD/SDHC/SDXC memory card (maximum 2TB – SDXC)
- **Recording**: Continuous recording of video and audio, alarm/events/schedule recording

### Fiber Optic Kit
- **VG4-SFPSCKT**
  - **Description**: Fiber Optic Ethernet Media Converter kit. Requires a small form-factor pluggable (SFP) module (sold separately).
  - **Data Interface**: Ethernet
  - **Data Rate**: 10/100 Mbps IEEE 802.3 Compliant
  - **Compatible Receiver**: CNFE2MC
  - **Installation**: Installed inside a VG4-A-PA0, VG4-A-PA1, VG4-A-PA2, VG4-A-PSU1, or a VG4-A-PSU2 power supply box with supplied mounting hardware

6. Kit available separately and must be installed inside the AUTODOME power supply box.

### SFP Modules
- **Description**: Interchangeable modules available for use with MMF or SMF optical fiber.
- **Data Interface**: Ethernet
- **Data Rate**: 10/100 Mbps IEEE 802.3 Compliant

### Mechanical
- **Dimensions (LxWxH)**
  - SFP-2 and SFP-3: 55.5 x 13.5 x 8.5 mm (2.2 x 0.5 x 0.3 in.)
  - SFP-25, SFP-26: 63.8 x 13.5 x 8.5 mm (2.5 x 0.5 x 0.3 in.)
- **Weight (all SFP modules)**: 0.23 kg (.05 lb)

### Fiber Compatibility
- **Optical Fiber Compatibility, MMF**: 50/125 µm MMF. For 50/125 µm fiber, subtract 4 dB from the specified optical budget value. Must meet or exceed fiber standard ITU-T G.651.
- **Optical Fiber Compatibility, SMF**: 8–10/125 µm SMF. Must meet or exceed fiber standard ITU-T G.652.
- **Optical Distance Specifications**: Specified transmission distances are limited to the optical loss of the fiber and any additional loss introduced by connectors, splices, and patch panels. The modules are designed to operate over the entire optical loss budget range, so they do not require a minimum loss in order to operate.

### Miscellaneous
- **Sectors/Titling**: 16 independent sectors with a 20-character title/sector
- **Masking**: 24 individually configurable privacy masks
- **Pre-positions**: 256, each with a 20-character title
- **Guard Tours**: Two (2) types of tours:
  - Recorded tours – two (2)
  - Preset tour – one (1), consisting of up to 256 scenes, consecutively
- **Supported Languages**: English, Chinese, Dutch, French, German, Italian, Japanese, Polish, Portuguese, and Spanish

### User Connections
- **Power, Camera**: RJ-45 10/100 Base-TX Ethernet (High Power-over-Ethernet (High PoE)) or PoE+ (IEEE 802.3at, class 4 standard) 21-30 VAC, 50/60 Hz
- **Power, Heater**: RJ-45 10/100 Base-TX Ethernet (High Power-over-Ethernet (High PoE)) 21-30 VAC, 50/60 Hz
- **Video and Control**: RJ-45 10/100 Base-TX Ethernet
- **Alarm Inputs (7)**: 2 supervised; 5 non-supervised Programmable for "normally open" or "normally closed"
- **Alarm Outputs (4)**: 1 dry contact relay; 3 open collector / transistor outputs 32 VDC @ 150 ma max.
- **Audio**: 1 x mono line in, 1 x mono line out
  - Signal line in: 12 kOhm typical, 1 Vrms max
  - Signal line out: 1 Vrms at 1.5 kOhm, typical

**Pendant**
- Clear high-resolution acrylic *(Included with pendant camera models.)*
- Tinted high-resolution acrylic

Polycarbonate bubbles are not recommended for use with HD products because of optical degradation.

### Mounts/Accessories

**Mounts/Accessories**

| Bubbles | |
| In-ceiling | |
| Clear HD high-resolution acrylic | VGA-BUBHD-CCLA |
| Tinted HD high-resolution acrylic *(Included with in-ceiling camera models.)* | VGA-BUBHD-CTIA |

| Pendant | |
| Clear high-resolution acrylic *(Included with pendant camera models.)* | VGA-BUBBLE-PCLA |
| Tinted high-resolution acrylic | VGA-BUBBLE-PTIA |

### Pendant Arm Mounts

- **Wall Arm (No Transformer)**
- **Wall Arm (120/230 VAC Transformer)**
- **Pendant Arm with Wiring**
- **Mounting plate for VGA-PEND-ARM**
- **Trim skirt for VG4 Series Power Supplies**

### Optional Mounting Plates for Arm Mounts

- **Corner Mounting Plate**
- **Mast (Pole) Mounting Plate**
- **Pendant Pipe Mounts**
- **Pendant Arm Mounts**
- **Pendant Roof Mounts**
- **Roof (Parapet) Mount** *(VG4-A-9543 Pipe Mount Cap required. Available separately.)*

### Optional Mounting Plates for Roof Mounts

- **Flat Roof Adapter for Parapet Mount**
- **In-ceiling Support Kits**
- **Bracket for suspended or drop ceilings**
- **Power Supplies**
- **High PoE Midspan 60W, single port, AC in**
- **Outdoor Power Supply Box, no transformer**
- **Outdoor Power Supply Box (120/230 VAC Transformer)**
- **Fiber Optic Kit**

3 Pipe Mount 6 Power Supply for Pipe and Roof Mounts

Ordering information

VG5-7230-EPC4 AUTODOME dynamic 7000 HD camera, 1080p30, 30x zoom, pendant, clear bubble
Order number VG5-7230-EPC4

VG5-7230-CPT4 AUTODOME dynamic 7000 HD camera, 1080p30, 30x zoom, in-ceiling, tinted bubble
Order number VG5-7230-CPT4

Accessories

High PoE Midspan, 60 W, single port, AC in
High Power, 60 W Single Port PoE Midspan with AC in
Order number NPD-6001A

VG4-A-PSU0 24 VAC Power Supply Unit
24 VAC, 100 W, white, for an AutoDome Series camera
Order number VG4-A-PSU0
VG4-A-PSU1 120 VAC Power Supply Unit
Power supply with transformer, 120 VAC input, for an AUTODOME or MIC7000 Series PTZ camera. White, aluminum enclosure with cover, rated IP66 and IK08. 100 W output. Optional trim skirt (sold separately). Order number VG4-A-PSU1

VG4-A-PSU2 230 VAC Power Supply Unit
Power supply with transformer, 230 VAC input, for an AUTODOME or MIC7000 Series PTZ camera. White, aluminum enclosure with cover, rated IP66 and IK08. 100 W output. Optional trim skirt (sold separately). Order number VG4-A-PSU2

VG4-A-PA0 Pendant Arm Mount
Pendant arm mount with power supply box for an AutoDome Series cameras, no transformer, white. Order number VG4-A-PA0

VG4-A-PA1 Pendant Arm Mount with 120 VAC Transformer
Pendant arm mount with power supply box for AutoDome Series cameras with a 120 VAC transformer, white. Order number VG4-A-PA1

VG4-A-PA2 Pendant Arm Mount with 230 VAC Transformer
Pendant arm mount with power supply box for AutoDome Series cameras with a 230 VAC transformer, white. Order number VG4-A-PA2

VGA-PEND-ARM Pendant Arm with Wiring
Compatible with an AutoDome Series pendant housing. Order number VGA-PEND-ARM

VGA-PEND-WPLATE Mounting Plate
Mounting plate for VGA-PEND-ARM, compatible with an AutoDome Series camera. Order number VGA-PEND-WPLATE

VGA-ROOF-MOUNT Roof Mount
Roof parapet mount, white. (VG4-A-9543 Pipe Mount Cap required. Available separately.) Order number VGA-ROOF-MOUNT

LTC 9230/01 Flat Roof Mount Adapter
For mounting a unit in an upright position on a flat surface for roof parapet mount VGA-ROOF-MOUNT. Order number LTC 9230/01

VG4-A-9541 Pole Mount Adapter
Pole mount adapter for an AUTODOME pendant arm or a DINION imager, designed for poles with a diameter of 100-380 mm (4-15 in.), white. Order number VG4-A-9541

VG4-A-9542 Corner Mount Adapter
Corner mount adapter for an AUTODOME pendant arm or a DINION imager. Order number VG4-A-9542

VG4-A-9543 Pipe Mount
Pipe mount, white, for an AutoDome Series pendant housing. Order number VG4-A-9543

VGA-SBOX-COVER Cover for AutoDome Power Supply Boxes
Order number VGA-SBOX-COVER

VGA-TSKIRT Trim Skirt for AutoDome Power Supply Boxes
Trim skirt for the following AutoDome Series power supply boxes: VG4-A-PSU0, VG4-A-PSU1, and VG4-A-PSU2. Order number VG4-A-TSKIRT

VGA-BUBBLE-PCLA Clear High-resolution Bubble for a Pendant Housing
Low-impact acrylic bubble. Order number VGA-BUBBLE-PCLA

VGA-BUBBLE-PTIA Tinted High-resolution Bubble for a Pendant Housing
Low-impact acrylic bubble. Order number VGA-BUBBLE-PTIA

VGA-BUBHD-CCLA Clear HD High-Resolution Acrylic Bubble for In-Ceiling AUTODOME cameras
Order number VGA-BUBHD-CCLA

VGA-BUBHD-CTIA Tinted HD High-Resolution Acrylic Bubble for In-Ceiling AUTODOME cameras
Order number VGA-BUBHD-CTIA

VG4-SFPSCKT Fiber Optic Ethernet Media Converter Kit
Ethernet media converter video transmitter/data receiver fiber optic kit. Order number VG4-SFPSCKT

SFP-2 Small Form-factor Pluggable Optical Interface
SFP Fiber Optic Module, Multi-mode, 1310 nm, 2 km (1.2 miles), 2 LC connectors. Order number SFP-2

SFP-3 Small Form-factor Pluggable Optical Interface
SFP Fiber Optic Module, Single-mode, 1310 nm, 20 km (12.4 miles), 2 LC connectors. Order number SFP-3

SFP-25 Small Form-factor Pluggable Optical Interface
SFP Fiber Optic Module, Multi-mode, 1310/1550 nm, 2 km (1.2 miles), 1 SC connector. Order number SFP-25

SFP-26 Small Form-factor Pluggable Optical Interface
SFP Fiber Optic Module, Multi-mode, 1550/1310 nm, 2 km (1.2 miles), 1 SC connector. Order number SFP-26
