

AXIS 213 PTZ Network camera

Pan, tilt and zoom live video directly over your network.

- > 26x optical zoom and 12x digital zoom
- > Superior image quality
- > Operates under all light conditions
- > 20 preset positions
- > Optional two-way audio

AXIS 213 PTZ Network Camera enables advanced remote monitoring with pan, tilt and zoom through operator control from any PC connected to a local area network or the Internet. It is ideal for monitoring people and property – indoors and outdoors – and for remote learning and troubleshooting.

This versatile network camera has a built-in 26x optical zoom, auto focus lens and a 12x digital zoom. It provides wide coverage with its ability to pan 340 degrees, tilt 100 degrees and zoom in on specific details.

AXIS 213 PTZ delivers simultaneous MPEG-4 and Motion JPEG video streams, allowing for optimization in image quality and bandwidth. The MPEG-4 compression mode is ideal for applications where available bandwidth is restricted and higher frame rates are required.

The camera can be manually controlled or scheduled for switching between color image during daytime, and black/white image in low light or nighttime conditions using the built-in IR lighting or an external IR lamp for longer distances.

The camera provides 20 preset positions and 1 preset sequence to monitor specific areas.

Two-way audio and alarm inputs/outputs are available with the optional AXIS 213CM Connection Module.
