

The Open Platform Company

XProtect® Screen Recorder

XProtect Screen Recorder is an add-on function that enables Milestone XProtect® IP video management software (VMS) to inconspicuously capture screen recordings of any Microsoft® Windows®-based computer or point-of-sale (POS) terminal. Captured screen recordings are managed in the same way as video data from cameras in XProtect VMS. This function helps manage loss and fraud by monitoring the use of business systems and documenting customer transactions.

XProtect Screen Recorder also improves efficiency by allowing users to audit staff activities and conduct training. It is easily installed on computers that should be monitored, and recordings are not only managed by the XProtect software but are also fully synchronized with other video data. This useful function is helpful in a wide array of industries that handle critical data, such as retail, banking and gaming.

XProtect Screen Recorder monitors desktop activity and improves operations:

- **Easily create evidence:** Captured screen recordings of transactions provide an account of fraudulent activities
- **Increase productivity:** Monitor critical activities to ensure operations are running efficiently
- **Help manage staff:** Supervise multiple computer screens, including activities in XProtect® Smart Client
- **Improve training:** Use recordings to educate staff and evaluate their user behavior/activity

Add-on for XProtect software

XProtect Screen Recorder is an add-on function that works seamlessly with all XProtect VMS products. Captured screen recordings are managed just like regular camera recordings in all of the XProtect clients. Therefore, captured screen recordings can be viewed in live and playback mode and exported for evidence in XProtect Smart Client, XProtect Web Client and XProtect Mobile.

System requirements

XProtect Screen Recorder can be deployed on Windows-based computers, including Windows-based POS terminals and cash registers.

- Client operating systems: Microsoft Windows XP or more recent
- Server operating systems: Microsoft Windows Server 2003 or more recent

Key features

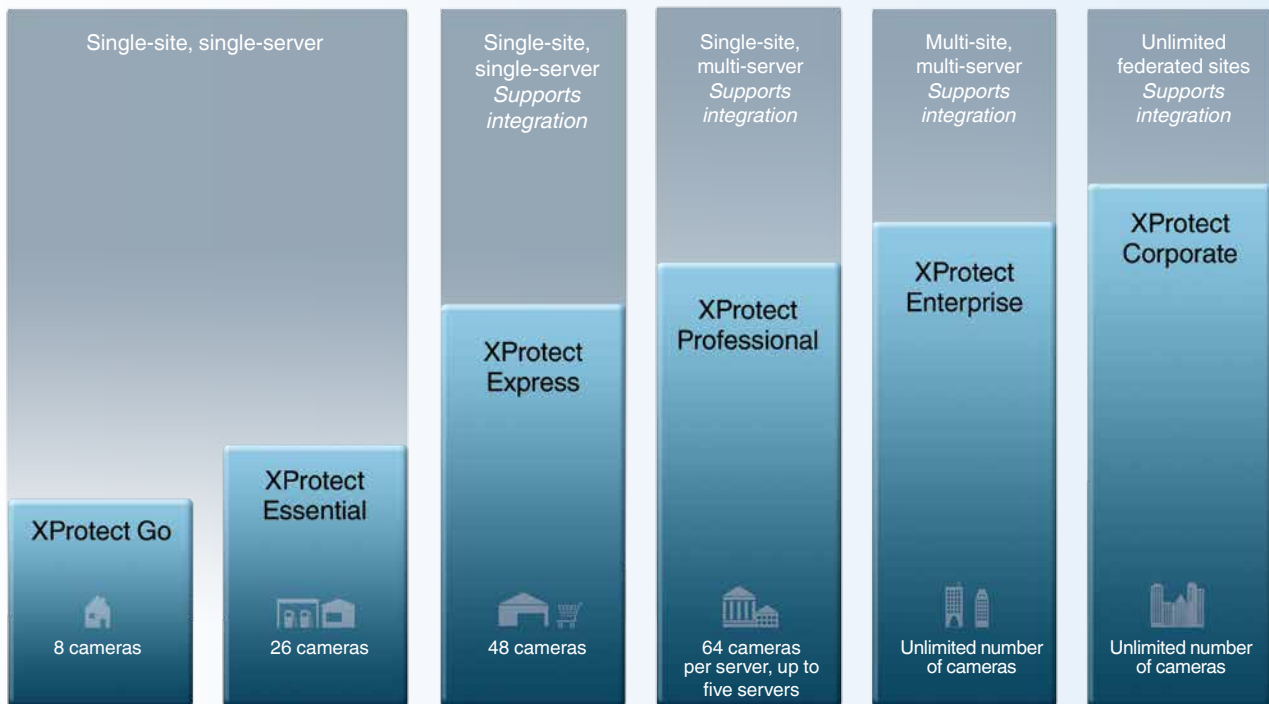

- Inconspicuous monitoring of POS terminals and computers
- Multi-screen recording
- Easy to configure recording quality and frame rate
- Compatible with all major Windows versions
- Works seamlessly with all XProtect VMS products

The Milestone Open Platform

A foundation for long-term success

Milestone's XProtect open platform video management software (VMS) integrates with the industry's widest choice in cameras, giving you the freedom to choose equipment according to your needs and budget. Committed to providing a true IP video open platform and freedom of choice, Milestone is proud to be among the first VMS vendors to support and lead the future progress of ONVIF and PSIA standards.

Integrate applications and systems into XProtect VMS with the Milestone Integration Platform Software Development Kit (MIP SDK). The open architecture of XProtect, together with the MIP SDK, allows for endless possibilities to add features and functionality for creating powerful, custom surveillance solutions.
